

Case Study

Client Bellway Homes (Chiltern) Ltd
Location Ampthill Heights, Ampthill
Project New Development

EHW were commissioned as architects, under our framework agreement, to provide the full working drawing package for this new development of 3, 4 and 5 bedroom houses on the outskirts of Ampthill.

The site was particularly challenging, being steeply contoured Greenfield land, resulting in the need for a particularly innovative design with respect to retaining structures and the houses themselves. The development comprises over 100 new houses with 25% affordable provision.

This development, although situated in a semi-rural position, has the added benefit of being walking distance from the centre of this small, well-respected Bedfordshire market town.
