

Case Study

Client HR Owen Sports Cars Ltd
Location School Road, Acton NW10
Project Phased Refurbishment of Service Facility

The new multi-franchise HR Owen Sports Cars Service Centre in north-west London is undergoing a phased refurbishment. **EHW** were commissioned to prepare a concept design for client approval and then project manage the tender and construction process for the new multi-franchise service reception. The new customer suite has been designed with a neutral palette and relaxed comfort in mind to satisfy the requirements of the luxury brands represented and also that of their exacting clients.

The practice was also commissioned to project manage the full design process throughout the next phase of refurbishment for both Bugatti and Rolls Royce servicing facilities with a large state of the art bodyshop. This personalised aftersales facility is the only repair and maintenance site authorised by Bugatti in the UK offering a collection and delivery service throughout the country.
