

## Case Study

**Client** Conamar Building Services  
**Location** MBDA UK Ltd, Hertfordshire  
**Project** New Atrium Glazing & Reception

As the main project architect for MBDA UK Limited since 2006, **EHW** has undertaken work at their various sites throughout the UK & Europe.

One of our initial projects for MBDA involved the infill of the quadrangle within two existing office buildings to form glazed atriums for use as presentation and display areas. The buildings' reception areas were also refurbished under the same contract.

Other projects have included a number of new build facilities, office refurbishments, space planning exercises, and public reception refurbishments at all of the UK sites.
